

ANNEXES TO SECTION 1

List of the pilot projects on direction

Code	# #	Symbol	Author	Location			Title
				Province	Rayon	Farm	
UZBEKISTAN							
1.01.Uzb.	1	Δ	V.Zheleznykh	Tashkent	Zangiata	NISTO SANIIRI	Determination of cotton water consumption under two methods of irrigation (furrow and sprinkler) and cotton water consumption normalization using lizymeters
1.02.Uzb.	2	Δ	O.Inchenkova	Syrdarya	Sh.Rashidov	collective farm G.Gulyam	Agricultural crops water consumption for definition of norms and terms of cotton irrigation
1.03.Uzb.	3	Δ	A.Ramazanov	Karakalpakstan		collective farm Oktyabr	Study of rice water consumption
1.04.Uzb.	4	Δ	F.Rakhimbayev	Tashkent	Yangiyul	collective farm Tinchlik	Study of winter wheat irrigation on typical grey soils of Tashkent oasis
1.05.Uzb.	5	Δ	M.Khamidov	Syrdarya	Gulistan	dekhkan farm Yangiabad	Field investigations on rational rice irrigation regime
1.06.Uzb.	6	Δ	M.Khamidov	Khorezm		collective farm Khalkabad	Irrigation regime of agricultural crops of cotton complex on hydromorphous soils
1.07.Uzb.	7	Δ	Kh. Umarov	Fergana	Akhunbabayev	collective farm Niyazov	Study and development of irrigation regime and nutrients application for cereals
1.08. Uzb.	8	Δ	E.Cholpankulov	Kashkadarya	Kamashinsk		
KAZAKHSTAN							
1.01.Kaz.	1	Δ	G.Zhdanov	Chymkent	Kzylkum massif	-	Study of secondary crops in rice rotation irrigation regime
1.02.Kaz.	2	Δ	R.Kvan	Kzyl-Orda	Terenozek massif	-	Water consumption norms for agricultural crops in rice rota-

Code	# #	Symbol	Author	Location			Title
				Province	Rayon	Farm	
							tion on non-saline and slightly saline soils in the Syrdarya lower reaches
1.03.Kaz.	3	Δ	R.Kvan	Kzyl-Orda	Terenozek massif	-	Water consumption norms for rice and lucerne on saline soils of the Syrdarya lower reaches
1.04.Kaz.	4	Δ	S.Magay	Chymkent	Кзылкумский массив	-	Normalization of water consumption and disposal for rice growing on background of vertical drainage
1.05.Kaz.	4	Δ	S.Magay	Chymkent	Кзылкумский массив	-	Normalization of water consumption and disposal for rice on background of horizontal drainage
1.06.Kaz.	6	Δ	V.Petrunin	Kazalinsk		-	Irrigation regime and irrigation norms for rice on background of horizontal drainage on Kazalinsk irrigation massif.
1.07.Kaz.	7	Δ	V.Petrunin	Kzyl-Orda	Terenozek massif	-	Development of irrigation regime and Irrigation norms for Terenozek massif
KYRGYZSTAN							
1.01.Kyrg.	1	Δ	R.Gorbacheva	Chui	Alamedin	collective farm Prigorodny	Perfection of water use norms and normatives system providing established level of crops yield and Irrigation water rational use
TURKMENISTAN							
1.01.Turk.	1	Δ	T.Djumanazarova	Pre-KopetDag	Akhal	collective farm Vatan	Vegetables water consumption under conditions of Pre-KopetDag zone
TADJIKISTAN							

Code	# #	Symbol	Author	Location			Title
				Province	Rayon	Farm	
1.01.Tad.	1	Δ	A.Akramov	Khatlon	Kumsanpir	collective farm Kommunizm	Thin-fibre cotton irrigation and consumption regime under all year use of land in extreme South-West of Tadjikistan
1.02.Tad.	2	Δ	M.Djurayev	Gissar valley	Bakhtar	collective farm Turkmenistan	Optimization of irrigation regime, water consumption and maize biological coefficients on lands of 3rd water allowance rayon.
1.03.Tad.		Δ		-	Shakhristan	SPA Zemledelie	Irrigation and water consumption regime of winter wheat in pre-mountain zones of Tadjikistan
1.04.Tad.	4	Δ	Ya.Pulatov	Leninabad	Khodjent	collective farm Lenin	Middle-fibre cotton irrigation regime on stony soils of Khodjent province
1.05.Tad.	5	Δ	Ya.Pulatov	-	Gissar	collective farm K.Marx	Crops irrigation regime in system of all year use of arable lands
1.06.Tad.	6	Δ	S.Satibaldyev	-	Gissar	Experimental farm of Tad-NIISKh	Optimization of middle-fibre cotton irrigation regime under conditions of Gissar valley
1.07.Tad.	7	Δ	M.Tukhliyev	Gissar valley	Lenin	collective farm Khosilot	Study of sugar beet water consumption and irrigation regime in Gissar valley

Appendix 2

Climatic characteristics of pilot projects on irrigation and drainage constructed in Central Asia in the past years
 (direction 1 - irrigation regime and water consumption norms)

Code of objects	Location	Temperature					Oc, mm	E, mm	D water availability	$K_y = \frac{O_c}{E}$	Y average year

KYRGYZSTAN											
1.01.Kyr.	collective farm Prigorodny, Alamedin district, Chui province	21-24	-32-83	9-10	3000-3800	380-460	180	1000	580	0,42	-
TURKMENISTAN											
1.01.Turk.	collective farm Vatan, Akhal province	-	-	-	5300 5400	186-257	128-149	-	-	-	-

Note:

t_{max} - maximum air temperature

t_{min} - minimum air temperature

t_{co.äia}. - average annual air temperature

Σef.t sum of effective temperatures higher than 10° N

t days without frost - duration of non-freezing period with temperature higher than 10° N

ññ - annual precipitation, mm

Å - evaporation, mm

D. water supply deficit

Êó - moistening coefficient

Appendix 3

Geomorphological-hydrological conditions of the pilot projects on irrigation regime and water consumption norms in Central Asia (direction 1)

Code of object	Location	Geomorphology	Lithology	Soil permeability		Artesian waters		Groundwater table		Salinity, g/l
